MEMORANDUM FOR: Director of Development and Procurement

SUBJECT : Missing Monitor and Mixer Assemblies

1. Background: C Racks have been shipped by Maywood Depot to Headquarters thence to Barton Hall for check out. Some of these units were unacceptable and were returned to Maywood via the Director of Materiel. Barton Hall [] stated that miscellaneous material including two monitor assemblies and mixer assemblies were returned to the Director of Materiel in March 1957, and the balance of the two units in June. The Director of Materiel and the Maywood Depot have been unable to locate the two monitor and mixer assemblies for the C Racks.

25X1

2. Problem: This would not normally be a problem to the undersigned since a Contracting Officer's responsibility normally terminates on initial delivery to the Depot where accountability is then assumed by the Supply System. However, the Contractor has indicated that unless the items are located that it will be necessary to manufacture new monitor and mixer assemblies as replacements.

3. Solution: Inasmuch as Barton Hall, Maywood Depot and the Director of Materiel have indicated the components have disappeared, it is recommended that the Contractor be authorized to furnish replacement components.
